

Cashback withdrawal

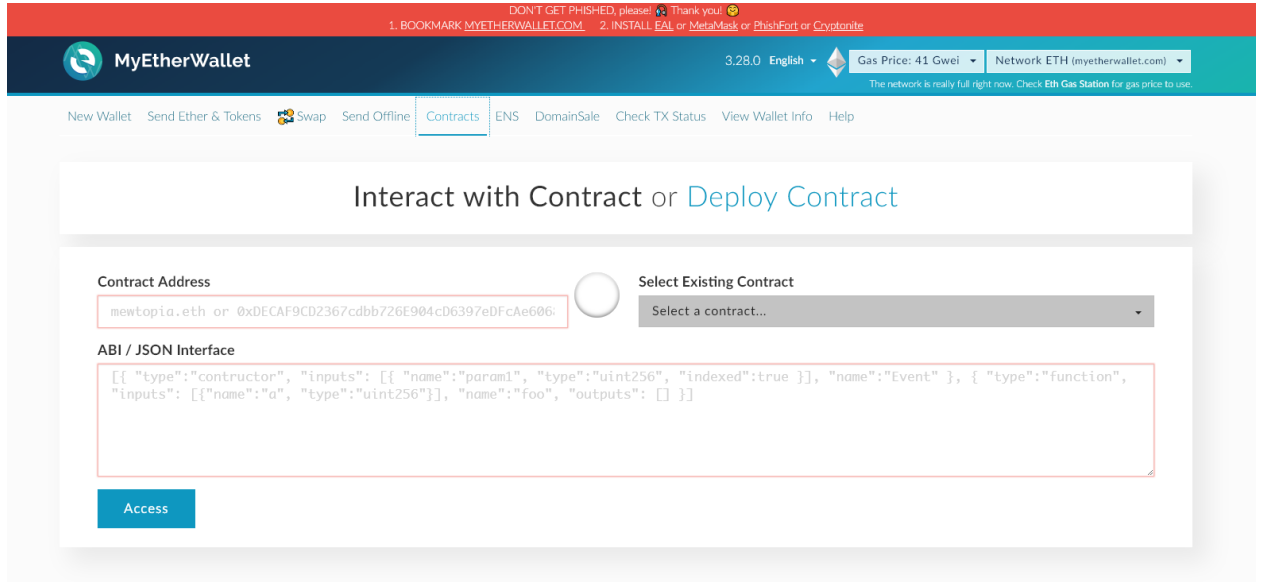

1. Go to <https://www.myetherwallet.com/>

2. Log in to your wallet in any convenient way

3. Go to **Contracts** section

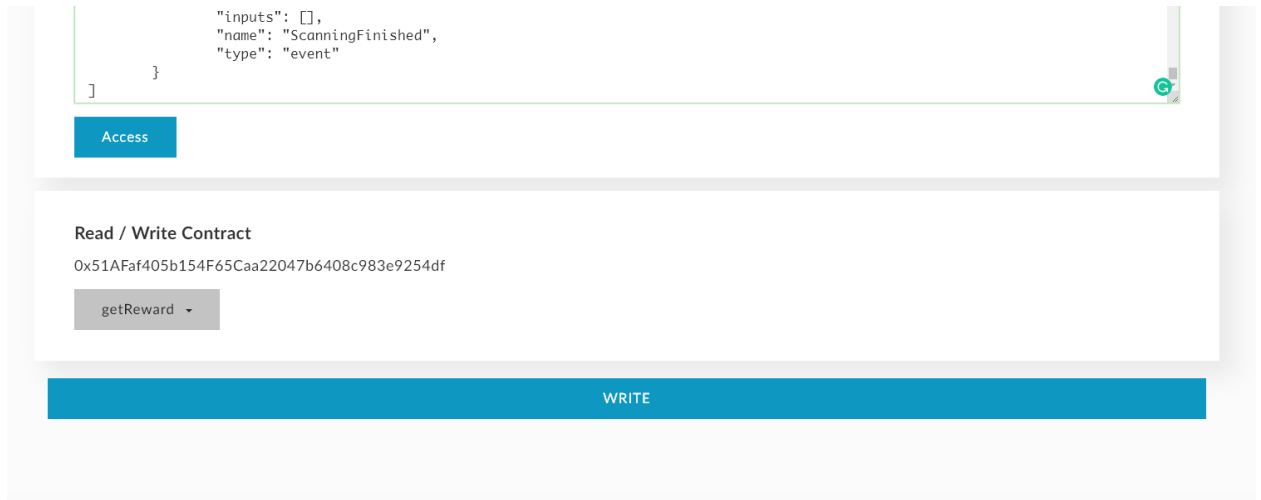

4. Please insert the following contract number in the Contract Address field:
0xD95A4c2E65FC98A8F5B7c36803E042a7b6cD7caF

5. **Attention! The Contract address changes every 3 months!**

6. In the field **ABI / JSON Interface** please copy the following code:

```
[  
  {  
    "constant": false,  
    "inputs": [],  
    "name": "getReward",  
    "outputs": [],  
    "payable": false,  
    "stateMutability": "nonpayable",  
    "type": "function"  
  }  
]
```

7. Choose the Get Reward function and click on Write

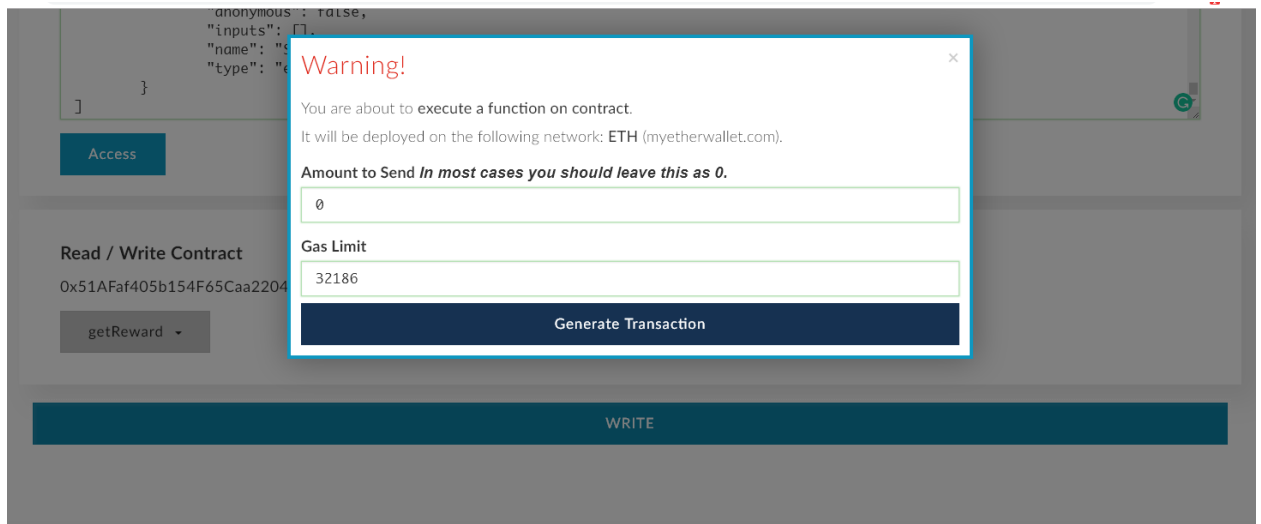

8. Then generate a transaction, but first make sure you have enough ETH to pay the GAS Limit.

IMPORTANT!

From now on you can withdraw CASHBACK to your Ethereum wallets. However, we do not recommend doing it now, with this situation on the market, when the major cryptocurrencies are falling in price. We remind you that every operation in Ethereum network is subject to commission. If you choose to withdraw your CASHBACK, the commission is charged from your account. So far, the Cashback reward is relatively low, so it may even be lower than the commission you pay for the transfer.

We recommend you to keep your CASHBACK in the system and withdraw it later, when the transaction is worth it.

```
anonymous : true,  
"inputs": [],  
"name": "ScanningFinished",  
"type": "event"  
}
```

 Your TX has been broadcast to the network. This does not mean it has been mined & sent. During times of extreme volume, it may take 3+ hours to send. 1) Check your TX below. 2) If it is pending for hours or disappears, use the Check TX Status Page to replace. 3) Use [ETH Gas Station](#) to see what gas price is optimal. 4) Save your TX Hash in case you need it later:
0xef647f9a9b7854cc5abfc8ab478f130e21d6cb4d128b3282f6325836bc487de3
[View your transaction](#)

9. Please check your wallet. ETH has been accrued to your account.
